

# UNIVERSAL TRANSMITTER

- Input for RTD, TC, Ohm, potentiometer, mA and V
- 2-wire supply > 16 V
- FM-approved for installation in Div. 2
- Output for current, voltage and 2 relays
- Universal AC or DC supply

### Advanced features:

- Programmable via detachable display front (4501), process calibration, signal and relay simulation, password protection, error diagnostics and selection of help text in several languages.

### Application:

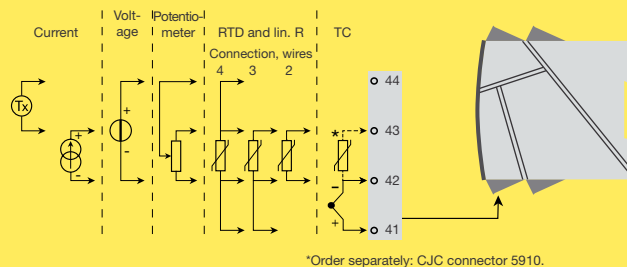

- Linearised, electronic temperature measurement with RTD or TC sensor.
- Conversion of linear resistance variation to a standard analogue current / voltage signal, i.e. from solenoids and butterfly valves or linear movements with attached potentiometer.
- Power supply and signal isolator for 2-wire transmitters.
- Process control with 2 pairs of potential-free relay contacts and analogue output.
- Galvanic separation of analogue signals and measurement of floating signals.
- The 4116 is designed according to strict safety requirements and is thus suitable for application in SIL 2 installations.

### Technical characteristics:

- When 4116 is used in combination with the 4501 display / programming front, all operational parameters can be modified to suit any application. As the 4116 is designed with electronic hardware switches, it is not necessary to open the module for setting of DIP-switches.
- A green / red front LED indicates normal operation and malfunction. A yellow LED is ON for each active output relay.
- Continuous check of vital stored data for safety reasons.
- 4-port 2.3 kVAC galvanic isolation.

## Applications

### Input signals:

### Output signals:

### Supply:

## Order codes:

4116 = Universal transmitter

4501 = Display / programming front

5910 = CJC connector

## PR 4501 Display / programming front

### Application:

- Communications interface for modification of operational parameters in 4116.
- Can be moved from one 4116 module to another and download the configuration of the first transmitter to subsequent transmitters.
- Fixed display for visualisation of process data and status.

### Technical characteristics:

- LCD display with 4 lines; Line 1 (H=5.57 mm) shows input signal, line 2 (H=3.33 mm) shows units, line 3 (H=3.33 mm) shows analogue output or TAG no. and line 4 shows communication and relay status.
- Programming access can be blocked by assigning a password. The password is saved in the transmitter in order to ensure a high degree of protection against unauthorised modifications to the configuration.

### Mounting / installation:

- Click 4501 onto the front of 4116.

### Electrical specifications:

#### Specifications range:

-20°C to +60°C

#### Common specifications:

|  |   |
|--|---|
| Supply voltage, universal .....          | 21.6...253 VAC, 50...60 Hz<br>or 19.2...300 VDC |
| Max. consumption.....                    | ≤ 2.5 W   |
| Fuse.....                                | 400 mA SB / 250 VAC                             |
| Isolation voltage, test / operation..... | 2.3 kVAC / 250 VAC                              |
| Communications interface .....           | Programming front 4501                          |
| Signal / noise ratio.....                | Min. 60 dB (0...100 kHz)                        |
| Response time (0...90%, 100...10%):      |   |
| Temperature input .....                  | ≤ 1 s   |
| mA / V input .....                       | ≤ 400 ms  |
| Calibration temperature.....             | 20...28°C                                       |

Accuracy, the greater of the general and basic values:

| General values |                   |                         |
|----------------|-------------------|-------------------------|
| Input type     | Absolute accuracy | Temperature coefficient |
| All            | ≤ ±0.1% of span   | ≤ ±0.01% of span / °C   |

| Basic values                    |                |                         |

| Dimen., without display front (HxBxD). | 109 x 23.5 x 104 mm                   |
| Dimensions, w. display front (HxBxD).  | 109 x 23.5 x 116 mm                   |
| Protection degree.....                 | IP20                                  |
| Weight .....                           | 170 g / 185 g with 4501               |

#### RTD, linear resistance and potentiometer input:

| Input type    | Min. value | Max. value | Standard  |
|---------------|------------|------------|-----------|
| Pt100         | -200°C     | +850°C     | IEC60751  |
| Ni100         | -60°C      | +250°C     | DIN 43760 |
| Lin. R        | 0 Ω        | 10000 Ω    | -         |
| Potentiometer | 10 Ω       | 100 kΩ     | -         |

#### Input for RTD types:

Pt10, Pt20, Pt50, Pt100, Pt200, Pt250, Pt300, Pt400, Pt500, Pt1000  
Ni50, Ni100, Ni120, Ni1000

Cable resistance per wire (max.), RTD 50 Ω

Sensor current, RTD..... Nom. 0.2 mA

|   |               |
|---|---------------|
| Effect of sensor cable resistance<br>(3- / 4-wire), RTD ..... | < 0.002 Ω / Ω |
| Sensor error detection, RTD.....                              | Yes           |
| Short circuit detection, RTD .....                            | < 15 Ω        |

#### TC input:

|                         |   |
|-------------------------|---|
| Thermocouple type ..... | B, E, J, K, L, N, R, S,<br>T, U, W3, W5, LR |
|-------------------------|---|

#### Cold junction compensation (CJC):

|                              |   |
|------------------------------|---|
| via external sensor          |   |
| in connector 5910 .....      | 20...28°C ≤ ±1°C<br>-20...20°C/<br>28...70°C ≤ ±2°C |
| via internal CJC sensor..... | ±(2.0°C + 0.4°C * Δt)                               |

Δt = internal temperature - ambient temperature

Sensor error detection, all TC types.. Yes

#### Sensor error current:

|                      |           |
|----------------------|-----------|
| when detecting ..... | Nom. 2 µA |
| else.....            | 0 µA      |

#### Current input:

|                                  |                      |
|----------------------------------|----------------------|
| Measurement range .....          | 0...20 mA            |
| Programmable measurement ranges. | 0...20 and 4...20 mA |
| Input resistance .....           | Nom. 20 Ω + PTC 50 Ω |

#### Voltage input:

|                                  |                                |
|----------------------------------|--------------------------------|
| Measurement range .....          | 0...12 VDC                     |
| Programmable measurement ranges. | 0/0.2...1; 0/1...5; 0/2...10 V |
| Input resistance .....           | Nom. 10 MΩ                     |

#### Current output:

|                                 |                          |
|---------------------------------|--------------------------|
| Signal range (span).....        | 0...20 mA                |
| Programmable signal ranges..... | 0/4...20 and 20...4/0 mA |
| Load (max.).....                | 20 mA / 800 Ω / 16 VDC   |
| Load stability .....            | ≤ 0.01% of span / 100 Ω  |
| Sensor error detection.....     | 0 / 3.5 / 23 mA / none   |
| NAMUR NE43 Upscale/Downscale..  | 23 mA / 3.5 mA           |
| Current limit .....             | ≤ 28 mA                  |

#### Voltage output:

|                                 |   |
|---------------------------------|---|
| Signal range .....              | 0...10 VDC  |
| Programmable signal ranges..... | 0/0.2...1; 0/1...5; 0/2...10;<br>1...0.2/0; 5...1/0; 10...2/0 V |
| Load (min.).....                | 500 kΩ  |

#### Relay outputs:

|  |  |
|--|--|
| Relay functions.....                   | Setpoint, Window, Sensor<br>error, Latch Power and Off |
| Hysteresis, in % / display counts..... | 0.1...25% / 1...2999                                   |
| On and Off delay .....                 | 0...3600 s   |
| Max. voltage.....                      | 250 VRMS   |
| Max. current .....                     | 2 A / AC or 1 A / DC                                   |
| Max. AC power.....                     | 500 VA   |
| Sensor error detection.....            | Break / Make / Hold                                    |
