

HART[®] TRANSPARENT DRIVER

- 1- or 2-channel version
- 3- / 5-port 3.75 kVAC galvanic isolation
- < 1.3 V voltage drop on input
- 16 V driving voltage on Ex output
- Universal supply by AC or DC

Application:

- Safety barrier for current signals and 2-way HART[®] communication transmitted to I/P converters mounted in hazardous area.
- Safety barrier for 2-way HART[®] communication and analogue current signals transmitted to hazardous area.
- Signal isolator with low response time on analogue current signals transmitted to hazardous area.

Technical characteristics:

- PR's HART[®] transparent driver primarily processes current signals of 4...20 mA.
- PR5107B is based on microprocessor technology for gain and offset. The analogue signal is transmitted at a response time of less than 25 ms.
- Inputs, outputs, and supply are floating and galvanically separated.

Mounting / installation:

- Mounted vertically or horizontally on a DIN rail. As the modules can be mounted without distance between neighbouring units, up to 84 channels can be mounted per metre.
